Fredrick Aniebonam

Frontend Engineer

✉ fredrick.ebuka33@gmail.com   🔗 github.com/fredluggard   🌐 linkedin.com/in/fredrick-aniebonam

I'm a highly motivated and detail-oriented front-end developer with skills in JavaScript (ES6+), React, Next.js, and UI/UX design principles. Proficient in responsive web design, version control (Git), and consuming RESTful and GraphQL endpoints to integrate frontend applications with backend services. I possess strong problem-solving skills, a passion for delivering high-quality solutions, and excellent verbal and written communication abilities. With a strong background in cultivating positive relationships and exceeding goals, I'm eager to join a dynamic team to continue delivering impactful solutions while furthering my professional growth.

Skills

- HTML & CSS
- JavaScript
- ReactJS
- NextJS
- TypeScript
- Version Control (Git)
- Amplify (AWS)
- React Query
- Tailwind CSS
- Styled-Components

- Problem-solving
- Creativity
- Time Management
- Communication Skill
- Responsive Designs
- Collaboration
- Team Leadership

Education

University f Nigeria Nsukka

- Bachelor of Science, Biochemistry
- 2016 - 2021

Experience

Fullstack Frontend - SoundRig   *October - 2024*

- As a Frontend Developer at SoundRig, I am currently involved in building and enhancing user-focused features for the music streaming platform. I work extensively with JavaScript, React, and TypeScript, collaborating closely with the development team to troubleshoot, optimize, and scale the codebase effectively. My role includes participating in code reviews to uphold quality standards and ensure consistency across projects.
- In addition to feature development, I contribute to the design and responsiveness of the platform, leveraging tools like Tailwind CSS and Git for streamlined development and version control. This role has provided me with valuable, practical experience in frontend web development and further refined my skills in creating dynamic, user-friendly web applications.

Frontend Intern - Genesys Tech Hub   *Jun - Sept 2024*

- As a Frontend Intern at Genesys Tech-Hub, I was involved in developing and implementing user-friendly features using JavaScript, React, Context API and Redux toolkit. My responsibilities include collaborating with the development team to troubleshoot and improve existing code, as well as participating in code reviews to ensure quality and consistency.
- Additionally, I was involved in contributing to the design and development of web applications, utilizing Git for version control and implementing responsive layouts using HTML, CSS, and Tailwind CSS. This internship opportunity provided me with valuable hands-on experience and the opportunity to further develop my skills in frontend web development.

Notable Projects

Vida   *Aug - 2024*

- Developed and optimized the user interface for Vida, a web-based platform for locating events and places in a city, using React.js and Tailwind CSS.
- Integrated mapping functionality with React-Leaflet, providing users with a dynamic and interactive location-based feature.
- Leveraged React Query for efficient data fetching and state management, enhancing performance and user experience.
- Collaborated closely with the design team to ensure the UI was responsive, accessible, and aligned with the project's goals.

Reflex   *Jun - 2024*

- Lead the frontend team in building and maintained the frontend architecture for Reflex an emergency response web application using React.js, React-Leaflet and other React libraries, ensuring a smooth and intuitive user experience.
- Implemented responsive design principles with Tailwind CSS, improving the platform's usability across different devices.
- Integrated React Query to manage client-side state, improving data consistency and reducing the complexity of API interactions.
- Collaborated with backend engineers to ensure seamless integration of the API, resulting in a highly performant and scalable platform.

Certification

Upskill (Web development)

- Genesys Tech Hub
- November - 2023

Learnable (Frontend Web Development)

- Genesys Tech Hub
- September - 2024
